FRONTEND-FOCUSED FULLSTACK DEVELOPER

Passionate full-stack developer deeply committed to open-source and fueled by creative exploration. Over the past two years, I've delved into a wide array of technologies, always eager to try new tools and approaches. In addition to professional work, I'm also a founder, pouring time and effort into personal projects where I can express my creativity and experiment. From planning, or crafting designs from scratch to building a full-stack application. I believe in fueling the technical side of field with creativity and experimentation

SKILLS

Figma UI/UX design	NodeJS, Express	React, Nextjs, Astro
Frontend development	Mysql, Postgresql, MongoDB	Tailwind, Bootstrap, etc..
Threejs, GSAP, framer-motion	Trpc, NestJs, Prisma	TS/TSX, JS/JXS, MD/MDX

PROFESSIONAL EXPERIENCE

Probably

Feb 2023 - Present

Founder - Product

Designed, planned, and developed prbly.xyz for an alpha release to understand user needs and develop more features for future releases. Launching Probably officially early 2024.
